## Profile

As a Full Stack .NET Developer with an active role in IT and systems administration, I am passionate about software development and continuous learning. I am currently studying a Higher Vocational Diploma in Networked Computer Systems Administration (ASIR) to gain an in-depth understanding of the infrastructure, security and systems that underpin the applications I build. I am particularly interested in the evolution of AI, cloud computing, cybersecurity and Big Data, with the clear goal of further specialising in these areas.

## Languages

Spanish: **Native**

Catalan: **Native**

English: **Upper-intermediate (B2)**

Fluent in everyday and professional use

## Additional Information

- Full driving licence (Category B).
- Own vehicle.

## Education

### Higher Vocational Diploma in Networked Computer Systems Administration (CFGS ASIR)

Universitat Oberta de Catalunya (UOC)

September 2025 – Present

### Higher Vocational Diploma in Cross-Platform Application Development (CFGS DAM)

Linkia FP

September 2022 – November 2024

### Master's Degree in Criminal Law and Criminal Policy

University of Málaga

September 2018 – July 2019

### Bachelor's Degree in Criminology

University of Girona

September 2014 – July 2018

## Professional Experience

### ● Full Stack Developer / IT Support & Systems Administration

Meibit Tech Solutions (Girona) | September 2024 – Present

- Development and maintenance of internal web applications using modern technologies such as **Angular** and **.NET (C#)**, plus **Python** for automation and scripting.
- Design, management and optimisation of **SQL Server** databases, including advanced queries, views and stored procedures.
- Implementation of backend services and **APIs** to integrate applications and automate business processes.
- End-to-end project ownership, from requirements analysis and technical design through to development, testing, deployment and documentation.
- IT support and systems administration as a point of reference for the team, troubleshooting incidents for both customers and internal users.
- Involvement in integration and support projects for clients such as **HIPRA**, **IESE Business School** and **Mossos d'Esquadra**, working in environments with stringent security and availability requirements.
- Active involvement in the implementation of ISO 9001 & ISO 27001 for Information Security Management standards.

### ● Sales & IT Technician – MediaMarkt

Media-Saturn Holding (Lloret de Mar) | July 2022 – September 2024

- Sales and specialised technical advice in the computing and consumer electronics department.
- Technical support for PCs, mobile devices and TVs: software installation, system provisioning and optimisation, and troubleshooting hardware and software issues.
- Development of IT support skills, incident management and direct user/customer interaction.

## Technical Skills

### Full Stack Development

- Languages: C#, TypeScript/JavaScript, Python, HTML, CSS.
- Frameworks & tools: .NET (REST APIs, backend services, WinForms/WPF), Angular, Visual Studio / VS Code, GitHub.
- Experience building full-stack internal business applications.

### Databases

- SQL Server: design and administration, advanced queries, views and stored procedures, with a strong focus on performance and reporting.

### Deployment, Systems & Automation

- Application deployment on Windows servers using IIS and Docker.
- Automation and scripting with PowerShell, Python and Bash (maintenance tasks, integrations and internal utilities), including the use of SQL Server Agent.
- User and policy management in Microsoft Entra ID and Active Directory.
- Collaboration on the implementation and maintenance of ISO 27001 information security controls.

### IT & Support

- Technical support for users (hardware, software, access and connectivity) and incident resolution.
- User lifecycle management: onboarding, changes and offboarding of accounts, permissions and applications.

### Personal Skills

- Holistic view of projects and ability to design end-to-end solutions.
- Strong focus on continuous improvement, thorough documentation and ongoing learning in real-world business environments.
